

March 1, 2001

Dear Sir,

I am writing concerning somethings that have been done to me. Which I know does not sustain from any natural medical condition. I reason to believe that I am being hypnotically controlled. (Hypnosis)

I believe it may have been a drug induced Hypnosis. Because I remember being drugged. And I remember the peoples reactions when I tied something around my arm to stop the blood flow.

Then it was like I became ill. And I thought or it felt like they were drilling me with questions concerning different people, different events in my life. Also they seemed to add things to jumble everything up.

When I would start talking to myself, (which I never did much before) it was like someone was listening. And other people would repeat it to me or they would imitate or act it out.

Also they would do a personality or switch places with me (so called walk in someone else's shoes) syndrome. They have imitated replacing the living with the dead. Also what someone said to me would be the way it had to go. ~~Then~~ they enjoyed the game of playing the opposite of what was said or done.

It has been a very symbolist game for everyone. My civil rights have been broken. I was a mother of one child. Now I am on the streets, child lost and would like to know how to

Stop this controll they seem to
have contained over me. I know
that I am not a split personality.
But I do believe someone has done
this to gain controll and destroy my
life. People have stolen from me
so called sharing I guess is
what they think. When ever
I go see me to symbolize something
and somebody benefits from it.

If you think I'm crazy
that is fine, but there is alot
more details to this.

If you have heard of this
or have any suggestions of how
to stop this or control this. Please
let me know.

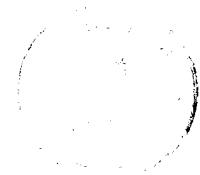

Thank You
Paula
